

**Dimensions:**

- **Dimension:** 23" H x 15" W x 12" D

**Materials:**

- **Shield:** Cut acrylic barrier.
- **Foot:** Black Melamine on MDF.
- *Minimal assembly required.*

**Packaging:**

- **Case:** flat packed with anti-static Packing peanuts
  - Total Package Size: (4" H x 16" W x 22" D)
- **Weight:** Shipping weight 8 LBS.

## DISINFECTING YOUR ACRYLIC SHIELD

When disinfecting or sanitizing acrylic panels, proper procedures should be taken. To minimize the risk of damage, use only compatible household cleaners listed below.

- Pharmacy grade hydrogen peroxide
- Isopropyl alcohol - dilute with water to 30% strength
- Household grade bleach - dilute with 50 parts water to 1 part bleach

Polycarbonate and acrylic products were tested on uncoated sheets. Do not use unapproved cleaners or disinfectants on sheet products. Generally speaking soap and water, hydrogen peroxide and isopropyl alcohol-based sanitizers work best as disinfectants on polycarbonate. Disinfectants containing hydroxides, dimethyl benzyl or ethyl ammonium chloride, ethylenediamines and hypochlorite will crack the polycarbonate sheets.
